Distinguished teachers,

Hello!

China Education Panel Survey (CEPS) is the first large-scale, nationwide, and longitudinal social survey of junior high students in China. The purpose of the CEPS is to provide detailed and reliable data for the research of the current situation and future development of China's primary education.

CEPS is jointly conducted by the National Survey Research Center (NSRC) at Renmin University of China and academic institutions throughout the country. During the academic year of 2013-2014, we are going to survey nearly 20,000 students as well as their parents, homeroom teachers, subject teachers and school administrators. Through scientific sampling, your class has been chosen as the sample class. We would appreciate it very much if you could help us finish this questionnaire. Thank you for your understanding and support.

There are neither right nor wrong answers to these questions and your answers will not be evaluated as part of your work performance or that of your school. Therefore, please write down your honest ideas and the reality of the sample class. We pledge here that under *the Statistics Law of the People's Republic of China*, we will hold all the information you are going to provide in strict confidence and it will never be given away to any individual or institution. Thank you for your cooperation.

When answering a multiple-choice question, please circle the number of your choice; when answering a blank-filling question, please write down words or numbers on the lines in the square brackets.
